EU PVSEC 2023

40th European Photovoltaic Solar Energy
Conference and Exhibition

EXHIBITION & SPONSORING

WELCOME TO THE EU PVSEC 2023

THE EU PVSEC is the **largest international Conference** for Photovoltaic research, technologies and applications, and at the same time a **state-of-the-art international PV Industry Exhibition** that attracts innovative companies, manufacturing enterprises and research centres from all around the globe. The exhibition stands are a **must-visit for companies working in R&D**, that depend on jumping on the wave of new trends as they are discovered.

THE EU PVSEC IS YOUR ENTRY POINT

to get in touch with top scientists from industry & research institutes, as well as policy makers from around the globe as they prepare for new investment opportunities! Learn about and discuss the latest solar technology trends as they are discovered!

The over 40-year long history and the diverse programme of the **EU PVSEC** makes it a landmark event in the scientific PV sector. For 2023, we are more than delighted to welcome you in person and to invite you to celebrate with us the **40th anniversary** of the **European Photovoltaic Solar Energy Conference and Exhibition** from **18 – 22 SEPTEMBER 2023 IN THE BEAUTIFUL CITY OF LISBON.**

GET IN TOUCH WITH THE GLOBAL PV INDUSTRY AT THE INDUSTRY SUMMIT 2023...

2022 was the year of **TERAWATT SOLAR**. The coming years are promising with ambitious targets to reach the next TW within the upcoming 3 years. PV production technology is in higher demand than it has been for 14 years and the renaissance of PV manufacturing in Europe comes right in time to help fight the first global energy crisis. There are, however, still major challenges to be faced. There is a pressing need for global diversification of PV manufacturing to reduce supply chain vulnerability and for vertical integration of PV production, which can lead to a more stable industry growth and also to a leveling of costs. Only a

holistic approach involving research, industry and policy can help Solar PV to unfold its full potential. EU PVSEC is committed to highlight the importance of the PV industry in the global energy transition and to offer a platform to discuss the latest industry achievements, trends and plans for the PV market. The **INDUSTRY SUMMIT** provides a forum for the exchange and discussion of industry topics, connecting policy makers and key players along all stages of the value chain, which combined with the business-to-business exhibition, constitutes a key place to be in 2023 for the worldwide PV industry agents.
